# Build Your Own Wind Turbine with Hugh Piggott

- **Six Day Course, Mon-Sat 9am-5pm**
- **Tools, Materials & Course-Book provided**
- **Location, Glas Learning, Ennisnag, Co.Kilkenny**
- **We will build one full machine from start to finish**
- **Cost, €350**, includes a 1 day workshop on Sat 18th in wiring up an off-grid system for Wind and PV  
Price to attend Saturday workshop only: €50
- **Booking**, contact Colm, Tel. 056 7730005 or visit [glaslearning.ie](http://glaslearning.ie)

## 6 Day Windpower Workshop 13 - 18 August

*"Wind is the closest thing to being able to magic clean energy from the air and Hugh Piggott is a true guru of the art"* **Tim Kirby, British Wind Energy Association**

Acclaimed Author of 5 books on wind systems, see Hugh Piggott at [scoraigwind.co.uk](http://scoraigwind.co.uk)

Build your own wind turbine workshop with internationally renowned wind expert Hugh Piggott at Glas Learning's Training centre, Kings River, Ennisnag, Kilkenny from August 13th to 18th 2012.

This is a 6 day all inclusive workshop offering you the opportunity to partake in building a wind turbine suitable to provide power for the average Irish home.

The turbine will be built using parts primarily sourced locally. Using Hugh's design plans participants will learn how to build and assemble each component of the machine from the master himself.

Hugh will be assisted by Jimmy and Miriam from Eirbyte who will also provide a 1 day course on Saturday the 18th focused on wiring and controls for managing the power generated from turbines.

- 6 Day course. Monday to Saturday 9.30am to 5pm
- Location is Kings River workshop space, beautifully set on the banks of the Kings River.
- All course materials and tools provided
- Course fee is €350 for 6 day course, €50 for 1 day controls course on Saturday 18th

### About Hugh

Hugh Piggott runs his own successful wind power business from his home on the beautiful windswept peninsula of Scoraig in Scotland. He advises individuals and companies at home and abroad on small to medium scale wind turbines and systems. He has been making machines for more than 30 years from locally sourced parts and teaching others how to do the same.

### About Glas Learning Centre

Set in a beautiful valley on the banks of the Kings River, the centre provides a wonderful space to host a workshop of this nature. Heated using a centralised wood chip boiler and host to other renewable energy training courses as well as carpentry and furniture making activities it promises to be a rewarding experience for all those that attend. The course will culminate on Saturday with the installation and connection of a 4.2m diameter machine on a 10m mast installed on site.
